PROFILE

Blockchain Developer seeking the next opportunity to continue developing Decentralized Applications (DApp). I'm particularly interested in exploring new approaches concerning Blockchain, cryptocurrency, and smart contract security. I have experience in several blockchain projects.

EXPERIENCE

Blockchain Developer
BEAMTEL

📅 Feb 2022 – august 2022 📍 Rabat, Morocco

- The subject that I'm working on it with my team is developing a platform that allows full end-to-end integration of mobility services, vehicles, and infrastructure and enables cars to become business entities to autonomously pay with blockchain technology for services like fueling, parking, or charging on their own

Full Stack Developer
DELIVMED

📅 Jan 2022 – May 2022 📍 Rabat, Morocco

- The subject that i worked on it with the team DELIVMED is developing a software platform that provides home medicine delivery services for fellow citizens and healthcare players.

Full Stack Developer
DEVTYCOONS

📅 May 2022 – Ongoing 📍 Rabat, Morocco

- The subject that i am working on it with my team is developing a web and mobile application that allows those who practice amateur sport to spend more time living their passion, less organizing themselves.

Intern
INTELLCAP

📅 Jul 2021 – Aug 2021 📍 Rabat, Morocco

- The subject that I worked on it with my team is " Exploratory research work for the development of a concept of quantum mobile ". During this two months of internship, I did research on the concept of quantum cryptography

LANGUAGES

English: Current
French: Current
Arabic: Current

PERSONAL SKILLS

- Ability to work under pressure.
- Ability to take initiative to solve problems.

INTERESTS

Blockchain   Movies   AI   Soccer

ACADEMIC PROJECTS

Crypto market sentiment app

- In this project i built a simple crypto market sentiment app where authenticated users can vote whether a token will trend up or down

----

NFTs mint Dapp (website)

- In this project I generated a collection of NFTs, hosted them on ipfs, created a smart contract based on the ERC 721 protocol and finally created an application in ReactJS which will allow to buy (minter) the NFTs of the collection.

Projet de DAPP complet : un Wallet Ethereum.
